TPM MASTERCLASS

€950

COURSE CONTENT

Join us for this 2 day Masterclass which focuses on the Total Productive Maintenance model developed by Peter Wilmott and Andy Brunskill. This workshop will explore both what and how to deploy an effective, systematic approach to TPM. We will not only look at the use of the appropriate lean thinking tools and systems we will also look at the leadership and engagement systems that will support sustainable change.

WHY ATTEND?

You will understand how to develop and support TPM within your own organisation; how to use the 11 step model to make systematic and effective change. We will use both case studies and gemba walks to bring the theory into practice.

ABOUT THE HOST SITE

Waters in Wexford are a leading manufacturer of analytical technologies; liquid chromatography, mass spectrometry and thermal analysis. The site in Wexford is a centre of excellence within the Waters Group. The site began operations in 1997 and now employs over 300 people. The site manufactures chromatography columns, solid-phase extraction devices and mass spectrometry instruments.

PRESENTED BY:

Andy Brunskill

I have been deploying business excellence systems for over thirty years and I have been supporting businesses all over the globe with business improvement techniques specialising in TPM during my tenure with S A Partners.

Andy Brunskill
